DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 8, 11 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Cohen et al. (3,159,165). See figs. 2 and 7.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim(s) 2-4, 6, 7, 9, 10, 12, -14 and 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cohen et al. in view of Meyer et al. (2,939,467). Cohen et al. discloses all of the limitations of the claim(s) except for a flap of flexible material wherein the flap is movable between a storage position and a closed position. Meyer et al. discloses the presence of a flap of flexible material wherein the flap is movable between a storage position and a closed position. See fig. 3. Hence, one skilled in the art would find it obvious to modify the system of Cohen et al. to include the a flap of flexible material wherein the flap is movable between a storage position and a closed position of Meyer et al. for the purpose of protection against the elements.

Art Unit: 3749

Claims 6, 9, 16 and 18 rejected under 35 U.S.C. 103(a) as being unpatentable over Cohen et al.. It is well-known in the art of HVAC to design a sleeve with an elastic periphery. Thus, it would have been obvious to one of ordinary skill in the art to incorporate the features of a sleeve with an elastic periphery into the system of Cohen for the purpose of protection against the elements.

Allowable Subject Matter

Claims 5 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The provided references are representative of the state of the art that is applicable to the applicant's invention. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Derek S. Boles at (571) 272-4872.
